24" Smart Sweeper – **ADVANCED TECHNOLOGY MACHINE** –

Manufactured by IPC Gansow, the largest manufacturer of sweepers and the fastest growing manufacturer of automatic scrubbers in the world.

The 24" SmartVac is in a class all its own as it changes the speed and efficiency as how we sweep across Carpet, Hard Surfaces, Matted & Rubber Tiles, etc.

- ALL AT THE SAME TIME - Without making any adjustments to the sweeper . . .

Regardless of the floor or type of debris - from leaves, paper, sticks and rocks (popcorn size) to dry powder - the 24" Smart Vac *automatically & immediately* makes the adjustment "AS FAST AS YOU CAN WALK."

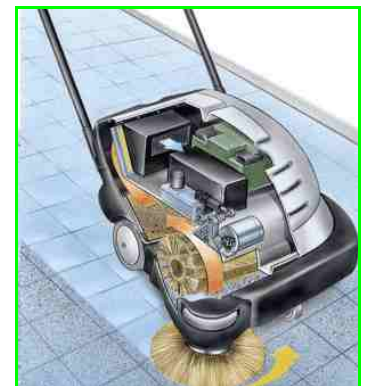

Using its smart technology, the 24" Smart Sweeper automatically & immediately adjusts to the floor surface and well as to the size and type of debris.

For the efficiency and effectiveness of using a wet scrubbing machine, "you always should sweep before you scrub," — you always need to extract as much loose and dry dust and debris from the floor as possible before using an auto scrubber.

Incredible Productivity: No other sweep device - including a "rider" can sweep a floor as fast and as effective as a SmartVac. Jobs that once took hours now takes minutes . . . **Outperforms an upright or shop vacuum 10 to 1:**

- Sweep 38,000 square feet of floor per hour — Drastically cutting labor time . . .
- An Upright Sweeper sweeps at less than 3,000 ft² / hour
- A wet / dry vacuum sweeps at less than 1,500 ft² / hour.

How Effective & Efficient is a Smart Vac? The large diameter brushes create a higher volume of airflow as they safely "flick" the surface to release solids and ultra fine dust particles. With the higher volume of airflow, surface agitation, and the internal high CFM of the vacuum's suction, deep embedded soils and fine powders are released from the surface and deep from within carpet fibers . . .

— **Even AFTER Carpets have been Swept with an Upright Vacuum Cleaner!**

Features:

High Performance: 2.5 hours of battery run time (12 volt wall plug-in charger).

Ultra Quiet: 55 dBA. A+ for use during business operations - considerably quieter than any type of electric vacuum cleaner.

Easy to use Control Panel: Simple on/off & programmable operation.

Automatic Filter Shaker: Constantly shakes the pleated filter for X-Long run times.

Model: 464E

Price: **\$2,100.00**

Weight: 91 lbs w/ battery installed, 24" sweeping/vacuum width.
